

FREE SENIOR OUTREACH SEMINAR

PRESENTED AT YOUR FACILITY

Every year, one in every three adults age 65 and older will suffer a serious fall. Among older adults, such falls can cause fractures and head injuries, even death. The bathroom is the most dangerous room in the home for our seniors.

Many older adults cherish the idea of aging in place, remaining in their familiar and comfortable homes. But ensuring their safety is paramount. Fortunately, practical modifications can be made to their living environment, especially the bathroom, to minimize the risk of falls and injuries.

Atlas Home Safety, a Certified Aging in Place Specialist (CAPS), is pleased to offer your senior clients and their families a ***free educational seminar*** titled "Aging in Place: Preparing Your Home for Senior Living." This informative session will cover:

- Common causes of slips, accidents, and injuries, particularly in bathrooms.
- Modifications that can significantly reduce these risks and the associated healthcare costs.
- An engaging interactive game with small prizes to reinforce key takeaways.

We are eager to bring this timely and valuable discussion to your facility. Additionally, we offer a ***complimentary lunch or dessert to attendees*** and participate in a program that donates to senior centers.

If you are interested in scheduling this presentation at your location or learning more about the program, please contact Dee Watkins, our Senior Outreach Coordinator, at 734-506-8977 or dwatkins@AtlasHomeSafety.com.

We look forward to partnering with you to support the well-being of your senior community.
